Windows Network Share Diagnostic Kit

Free preview | three routes | one page

WHAT IS INSIDE

A **The credential prompt rejects the correct account**
Windows keeps asking for credentials or says access is denied.

B **The share is not visible or cannot be reached**
The other PC cannot see the share or gets a network-path error.

C **The share worked, then disappeared**
A mapped drive or share stops after a restart, update, or network change.

For Windows SMB share. Full kit: multi-page guide, fillable worksheet, and retest/recovery checklist.

The full kit is a download. Live one-to-one help is separate, through Request a quote.
